1. The following is an examiner's statement of reasons for allowance: the closest prior art Ristey et al teach shrink films and articles including the same wherein the shrink film comprises a biaxially oriented polymer film comprising a polypropylene core layer having a Young's modulus, an elongation and a tensile strength that fall within the instantly claimed ranges wherein the film is stretched for example by a ratio of 7 in the machine direction and transverse direction and the film may further comprise thinner coextruded skin layers on either or both sides of the core wherein the skin layer(s) comprise propylene co or terpolymers such as with ethylene and or butene, preferably a propylene copolymer with no more than 7% ethylene, and a slip additive such as wax, silica particulate or polysiloxane, in amounts within the instantly claimed range, wherein the film surface may be modified by corona discharge treatment and the film may be metallized. Ristey et al do not teach or render obvious that the films are heat set as instantly claimed and in fact teach away from heat setting the films given that the films are taught to be shrinkable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
